

Safety for Supervisors, Managers & Team Leaders

Safety is a competitive reality.

You can't afford to have your skilled workers sidelined.

There's a saying among pilots, for whom one mistake is one too many, "Safety is sexy." If you do the math, the cost of safety is small compared to the cost of accidents, shutdowns, loss of skilled help, hiring and training new help, and of course fines and increased compensation fees. This practical workshop will focus on the "how to's" for front line leaders to **improve OHS efficiency, effectiveness and excellence.**

Who Should Attend:

Company leaders, managers and supervisors and anyone who has a direct responsibility for safety and those with direct responsibility for safety. Anyone who wants to improve the safety culture within the organization.

What You Will Learn:

How to prevent costly accidents and injuries. Improved methods of hazard identification and analysis; improved management control over operating processes and changes.

Seminar Content:

Day 1:

- Safety Leadership
- Roles/Responsibilities
- Due Diligence/Bill C-45
- Training/Orientation
- Risk Assessment

Day 2:

- Inspections and Incident Investigation
- Motivating employees in occupational health and safety
- Effective communication
- Progressive discipline process

Prerequisite: None

Your Facilitator: Lloyd Cook in his 40 years with Dupont Canada held several positions as foreman in operations, supervisor in human resources, supervisor in operations, manager in operations and manager for health, safety, security and fire. While managing safety at several sites he also spent twenty percent of his time doing corporate safety work.

He has a Masters of Business Administration degree with a major in Human Resources. He spent fifteen years as safety manager in DuPont Canada, receiving training at their safety division in Wilmington Delaware. He is a Certified Safety Auditor in the DuPont organization.

He has received several safety awards for his contribution to safety technology. He has been involved with the I.A.P.A. as chair person for Central Ontario, and Durham Region. He was also a member of the Canadian Plastic Safety Association Team.

He has successfully improved "On The Job Lost Time Injuries" as much as seventy percent within a year.

Course Dates: Sept 27th and 28th at the LTKC training facility.

Investment: \$799 per person, includes lunch, parking and comprehensive manual.

Skills that WORK.
